

HMR ENGINEERING INC

ENGINEERING & MATERIALS TESTING

Engineering Intern – Civil, Structural, Geotechnical & Environmental

Job Description

Our Grande Prairie office is currently searching for Geotechnical, Environmental and Civil/Structural Engineering Interns. The successful candidate will report directly to our senior design engineers.

Your Responsibilities

- Travel to various sites in the Peace Region and perform engineering investigations and analyses
- Perform some laboratory testing.
- Daily field reporting and documentation.
- Reviewing project specific literature and summarizing relevant information.
- Entering data and participating on various design projects.
- Participating in field investigations which may include drilling, slope stability, risk assessments, instrumentation installation, structural inspections and construction review.
- Topographic or construction surveying with GPS survey equipment.
- Developing reports for site investigations and construction projects.
- Developing presentation on completed projects

Desired Skills and Experience

- High school diploma
- Enrolled at an accredited university
- Valid Canadian driver's license with a clean driving abstract.
- A solid understanding of MS Office.
- Superior written and oral communication skills.
- Ability to work and travel throughout the province.
- Ability to work independently with minimal supervision or as a member of a team.
- Exceptional organizational and problem solving skills.
- Self motivated and a high level of energy.
